

AMENDMENTS TO THE SPECIFICATION

In the specification:

Please amend paragraph 0037 of the specification as follows:

The time signal so obtained allows user 1b to either stamp and store data received from a third party, or to, in turn, attach the time signal to data to be sent, and to newly encrypt it with the key of his/her own clock system 6b and send it to central system 3 installed at a receiver, or to send the data, for example, via communication connection 11, network 2 and connection 14, to a network user 1e[[c]] who has also registered with the method.
